HEALTH SCIENCES **DENTISTRY**

ADEMA
University School

What does it consist of?

The fundamental objective of the Bachelor's degree in Dentistry is to train the best professionals with general scientific/technological knowledge and the basic theoretical and practical notions related to Dentistry and Oral Health.

Competences

This degree is designed to provide students with all the theoretical knowledge and practical skills necessary to practice the regulated profession of dentistry.

**BACHELOR'S
DEGREE**

Admission profile

- Service-oriented vocation in healthcare activities.
- Pre-existing interest in Health Sciences.
- Special sensitivity to hygiene.
- Ability to work in specific, multidisciplinary, and/or international teams.
- Ability to work under pressure and meet deadlines and objectives.
- Capacity for critical and flexible reasoning.
- Commitment to ethical principles.
- Ability and ease in interpersonal relations and communication.
- Open-mindedness to technological advances and new techniques.
- Ability to recognize and accept diversity and cultural differences.

What career opportunities will you have?

- Running their own dental clinic and being a worker affiliated with the special regime of self-employed workers.
- Working for others. This can involve different possibilities:
 1. Providing dental services to other professionals and companies that offer such services.
 2. Working in public health services (health centers, hospitals) as a dental healthcare professional after passing relevant competitions or exams.
 3. Working in other European Union countries where there is a significant demand for Spanish dentists.
- Involvement in projects promoting health that can benefit the well-being of the general population or specific groups.
- Working as an educator in universities, vocational training programs, or private sector companies.
- Engaging in research in universities and private sector companies.
- Joining dental sector companies with responsibilities in the development, sales, and marketing of dental products.

STUDY PLAN

FIRST YEAR

Semester 1

Human Anatomy*.
Human biochemistry*.
Human Microbiology and Immunology*.
Introduction to Health Research and Statistic*.
Human Histology*.

Semester 2

Psychology, Communications and Health*.
Human Physiology*.
Biomorphology and Microbiology of the Stomatognathic System*.
Epidemiology and Public Health*.
Radiology and Legal Dentistry*.

SECOND YEAR

Semester 1

Dental materials, Equipment Instrumentation and Ergonomics I*.
Medical Pathology and pathological anatomy I.
Introduction to surgery.
Basic preventive and community dentistry.
Pharmacology*.

Semester 2

Dental materials, Equipment Instrumentation and Ergonomics II*.
Medical Pathology and pathological anatomy II.
Oral Medicine I.
Stomatological Prosthesis I.
Dental Pathology.

THIRD YEAR

Semester 1

Dental Surgery.
Orthodontics I.
Stomatological Prosthesis II.
Pediatric Dentistry I.
Evidence- Based Dentistry.

Semester 2

Endodontics.
Periodontology I.
Orthodontics II.
Oral Surgery I.
Dental Office Informatics and Planning.

FOURTH YEAR

Semester 1

Preventive and Applied Community Dentistry.
Stomatological Prosthesis III.
Restorative Dentistry and Clinical Endodontics.
Periodontology II.
Orthodontics III.

Semester 2

Pediatric Dentistry II.
Stomatological Prosthesis IV.
Dental Aesthetics
Oral Medicine II.
Oral Surgery II.

FIFTH YEAR

Semester 1

Integrated Adult Dental Clinic I.
Children's Integrated Dental Clinic
Elective.
Research and Documentation in Dentistry.

Semester 2

Integrated Adult Dental Clinic II.
Dentistry in Special Patients.
Bachelor's Degree Final Project in Dentistry.
Elective.
External Academic Internships in Dentistry.

Credits ECTS: 300

78

Basic Training*

174

Mandatory

12

Electives

30

Academic
Internships

6

Bachelor's
Thesis
